

GROWING DEEP, STANDING TALL

NBB - the first Bahraini bank, has been a pioneering financial institution and a national pillar of success for over 50 years. It has grown roots deep and wide into the nation's economy by creating the largest network of branches and ATMs and building one of the largest customer base in the Kingdom. As a company that understands and reflects human motivation and values, NBB's people, from top to bottom, work with a passion and commitment that reflects a pride in this well-honed system, and speaks volumes about the longevity of the institution.

NBB's solid reputation which was built by following the path of prudence, remains unshaken despite an environment of global financial turmoil. The Bank's instinctively conservative nature has reinforced a safe, sensible and sustainable way forward.

Having partnered the nation-building process, NBB is firmly embedded in the nation's economic and social psyche. It is seen as a symbol of trust, strength and security, one that stands proudly and grows taller year by year, aided by a dynamic team...for being well rooted in our past engenders the success over many tomorrows.
